...some
LOVE!

Have you shown your eyes some love?

It can be as simple as seeing your eye doctor once a year for the annual comprehensive wellness eye exam. Through comprehensive wellness vision exams is how most people find their eye doctor, but they keep their eye doctor because of the other services the office and the professional have to offer their family.

All of February we will be highlighting the other services that set 4Sight iCare apart. This may serve as a reminder that the doctor saw cause to order an MVP (maximum vision protection/performance), DEAA (Dry Eye and Allergy Assessment, SVT (Sports Vision Training), or other service including complimentary consultations. We hope it also starts a conversation about caring for your loved ones eyes. Please share the information with friends/neighbors and attend our appreciation event on Wednesday, Feb 7th, 1 week before Valentine's Day (wine & snacks).
